hackerrank.com/ashishgawade03

TECHNICAL SKILLS

Programming Languages: C#, TypeScript, JavaScript, T-SQL

Backend: ASP.NET Core, ASP.NET Web API, .NET, ADO.NET, LINQ, RESTful APIs, Entity Framework Core, VB.NET

Frontend: Angular, HTML5, CSS3, TypeScript, JavaScript, Bootstrap, Knockout.js, jQuery, AJAX, JSON

Databases: Microsoft SQL Server, MySQL, Stored Procedures, Query Optimization, Indexing, Database Design, MongoDB

Cloud & DevOps: Microsoft Azure, Azure App Services, Azure Containers, Azure DevOps, Git, Bitbucket, Jenkins, Docker, CI/CD

Architecture & Practices: REST APIs, Microservices Concepts, Object-Oriented Programming, SOLID, Design Patterns, Clean Code, Reusable Components, Agile/Scrum, Code Reviews

CS Fundamentals: Data Structures and Algorithms (**100+ problems across LeetCode and HackerRank**), OOP, DBMS

Tools & Libraries: Visual Studio, Visual Studio Code, Postman, Stimulsoft, Chart.js, SourceTree, Jira, Taiga

EXPERIENCE

Software Development Engineer

July 2022 – Present

Ascent HCM

Pune, India

- Develop and maintain enterprise **full-stack HR applications** using **C#, ASP.NET Core, RESTful Web APIs, SQL Server, Angular, Knockout.js, and JavaScript**.
- Design and implement **RESTful APIs and backend services** in C#, integrating frontend applications with backend business logic and structured JSON responses.
- Designed and developed **20+ reusable UI widgets and components**, including Leave Balance, Staff on Leave, Team Leave Calendar, Team Availability, Holiday, Leave Trend, and Leave Utilization dashboards.
- Optimized **T-SQL queries, stored procedures, database operations, indexing, and LINQ/EF Core queries** to improve application performance.
- Used **Git, Bitbucket, Jenkins, Docker, CI/CD, and Microsoft Azure** for source control, automated builds, application hosting, and deployment workflows.
- Investigated and resolved **30+ customer-reported production issues**, performing root-cause analysis, debugging application and database issues, and delivering stable fixes within Agile sprint cycles.
- worked in collaboration with developers, QA's, product owners and customers in an **Agile/Scrum environment**, participating in planning, estimation, issue resolution, and feature delivery

PROJECTS

Leave Dashboard | ASP.NET Core, C#, Web API, Angular, TypeScript, MS SQL, VB.NET, Chart.js, IIS

- Lead the development of a dynamic **Leave Dashboard** with Leave Balance, Leave History, Leave Trend, Staff on Leave, Team Leave Calendar, and Team Availability features. Designed **C# RESTful Web APIs**
- Implemented business logic using **VB.NET and C#** and optimized **T-SQL queries and stored procedures** for attendance and leave data. Knockout.js frontend components for dynamic data-driven functionality.

AI Smart Notes Manager | ASP.NET Core MVC, C#, Semantic Kernel, LLM, RAG, SQL Server

- Developed an AI-powered **smart notes management application** using **ASP.NET Core MVC, C#, Semantic Kernel, LLM, and RAG. Integrated Semantic Kernel with LLMs.**
- Implemented a **RAG-based approach** for context-aware question answering from stored notes.

EDUCATION

Savitribai Phule Pune University

Pune, India

Master of Computer Science (MCS) – CGPA: 9.10 / 10

Aug. 2022 – May 2024

Savitribai Phule Pune University

Pune, India

Bachelor of Computer Science (BCS) – CGPA: 9.11 / 10

Aug. 2019 – May 2022

CERTIFICATIONS

DevOps: Docker, Kubernetes, Jenkins, Azure DevOps

C# Intermediate: Classes, Interfaces and Object-Oriented Programming
